

CASE STUDY: EXECUTIVE PROTECTION

INDUSTRY: NETWORK SECURITY

Introduction

A leading network security provider engaged us to provide protective services to its high net worth individuals during their travel to India.

Methodology

A team of specialized executive protection consultants was dedicated to the task of ensuring the ground checks in accordance to the itinerary of the visiting delegates. This was followed by:

- Pre visit Risk Assessment & Risk Monitoring of scheduled place of visit
- Regular situation update to the client security coordinator prior & during the visit
- Route Mapping for all locations
- Prior inspection of all the locations scheduled to be visited (including hotels)
- Thorough inspection of vehicles to be used at all locations
- Identification & training of the drivers at all locations
- Airport facilitation
- Full time logistics support & close protection during the visit
- Backup emergency team

Result

Ensured smooth & uninterrupted conduct of the visit and avoided any chances of disruption or delay in the schedule of the principal(s). Efficient logistical support enabled the client to carry out the schedule as marked.

Business Challenge:

Any travel to a relatively new environment requires detailed analysis of the ground realities. Considering the same aspect we were asked by the client to provide full time protective support to facilitate the individuals visiting the country.

Benefits:

- Sense of comfort with experienced professional handling the security and travel facilitation.
- Minimal disruption & delay in the client schedule.
- Support at time of contingency(s) & crisis.
