

WE HELP UNCOVER CRIME IN THE CYBER WORLD

PINKERTON HAS ASSEMBLED A HIGHLY SPECIALIZED TEAM OF LEADING EXPERTS IN INFORMATION SECURITY, FOCUSING ON COMPUTER FORENSICS, ELECTRONIC DISCOVERY, PHYSICAL & IT SECURITY, AND CYBER CRIME INVESTIGATIONS.

Our IT practice supports technology-driven litigation and engagements in the following ways:

- **Electronic Discovery**
- **Computer Forensics/Expert Witness Testimony**

ELECTRONIC DISCOVERY

Electronic discovery provides an unparalleled wealth of information in key cases such as prosecution of corporate fraud, investigating theft of trade secrets, monitoring illegal and insider trading, and combating improper solicitation of employees. Using leading edge computer forensic tools and techniques, we delve deep into the recesses of hard drives, uncovering valuable information that can make a substantial impact on the success of a litigator's case.

COMPUTER FORENSICS / EXPERT WITNESS TESTIMONY

Our skilled computer forensics examiners are equipped with the most advanced computer tools and protocols. Our computer forensics services include assisting in the preparation of discovery requests for electronic data, on-site seizure of evidence, thorough processing of information, complete analysis of the findings, reporting the findings in a clear and concise manner, and expert testimony in a criminal or civil proceeding.
