

We help Secure your Supply Chain

The threats industry faces today are categorically different from those of a decade ago and there is a compelling need for industry to secure the entire supply chain.

With increased offshoring of manufacturing facilities and suppliers and the globalization of the world economies, more and more firms are finding that their supply chains now span the globe as a matter of doing business. With this trend comes the very real need to minimize risks and loss by increasing and/or improving security measures of these vital supply chains.

Pinkerton has the depth of experience in domestic and international supply chains that comes from providing security planning, designing, and implementing of complex supply chain security initiatives for major global private sector and government clients.

In this field our expertise encompasses:

- Supply Chain Security
- Cargo Loss Vulnerabilities Assessments
- Cargo loss Prevention Programs
- Transportation Security
- Security Updates
- C-TPAT (Customs and Trade Partnership Against Terrorism)
- World Customs Organization

Framework to Secure and Facilitated Trade (Authorized Economic Partner)

Many small, medium, and large companies ask Pinkerton to assist them in applying for and complying with C-TPAT. Pinkerton has been selected by the International Cargo Security Council and the Toy Industry Association to assist their members with C-TPAT.

We can provide complete assistance for conducting comprehensive supply chain security self-assessments and security questionnaires to CBP (Customs & Border Protection). We can also help you in developing and implementing long-term programs to enhance supply chain security and communicate C-TPAT guidelines to the vendors in their supply chains.
